

**CREATIVE  
EXTERIORS, LLC.**  
CUSTOM LANDSCAPE CONSTRUCTION

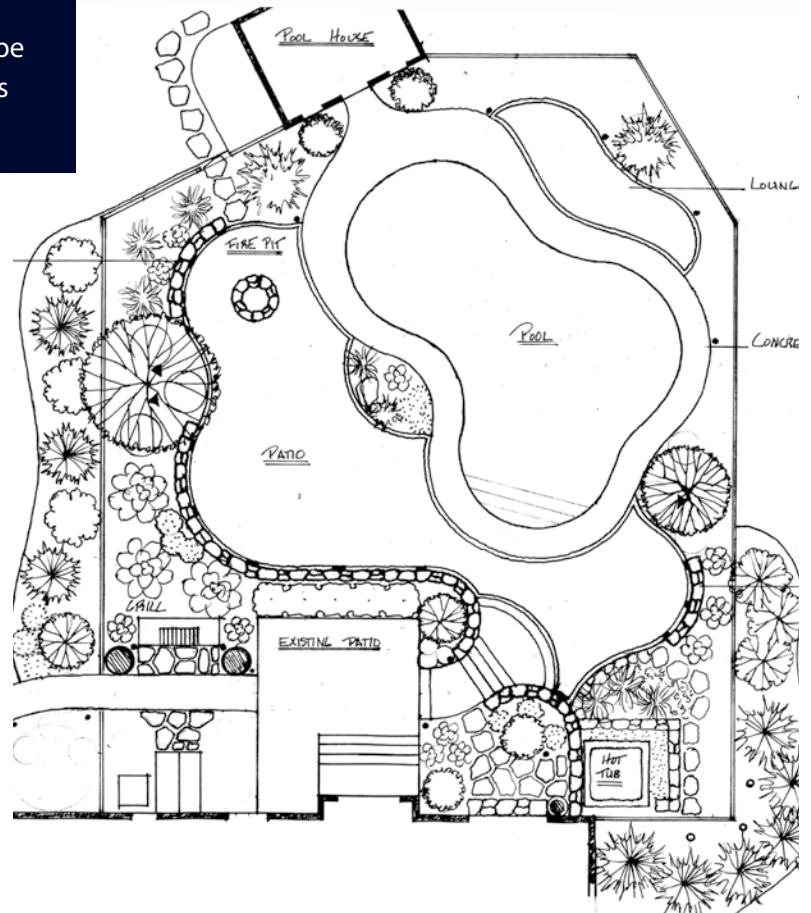

## DESIGN BUILD LANDSCAPE CONSTRUCTION

Creative Exteriors is the area's leader in design/build construction and maintenance services for residential and commercial landscapes. The vision of our qualified professionals is to welcome new and innovative landscape design while preserving the many sacred characteristics found in traditional New England landscapes.

## DESIGN/BUILD PROCESS

**1** The first step in the Design/Build Process is the initial consultation. This is the time to discuss your needs, likes, dislikes and available budget. This is also when our design staff will analyze your existing site conditions. Existing natural features, topography, and existing vegetation will be considered as well as any problem areas requiring a creative solution. Be sure to prepare by compiling images of things that appeal and relate to you and your family's lifestyle. When combined with the site analysis the information you provide will supply the framework for the design. Our goal in the studio is to develop environmentally friendly concepts that compliment your sites architecture, and meet your family's needs and lifestyle.

**2** Once the design plan is complete a second meeting is scheduled to discuss the preliminary plan and estimate. Remember design professionals should always encourage feedback from you especially at this point in the process. This is the time to make revisions should there be any concerns regarding the initial design. Revisions are much easier and less expensive to make on paper than in the field! Once the revisions to the plan are complete and the design is agreed upon an estimate for implementation will be given.

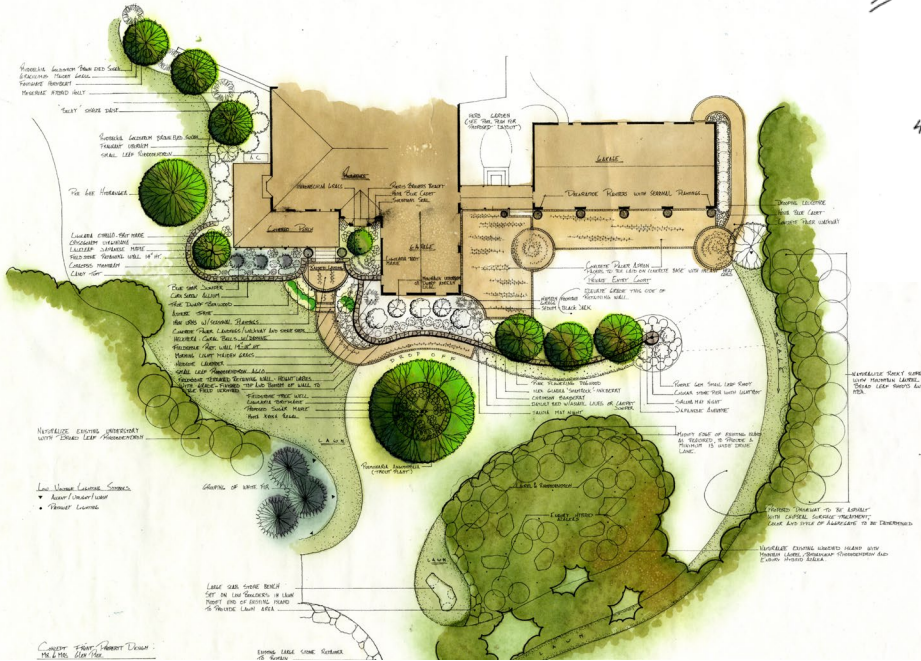

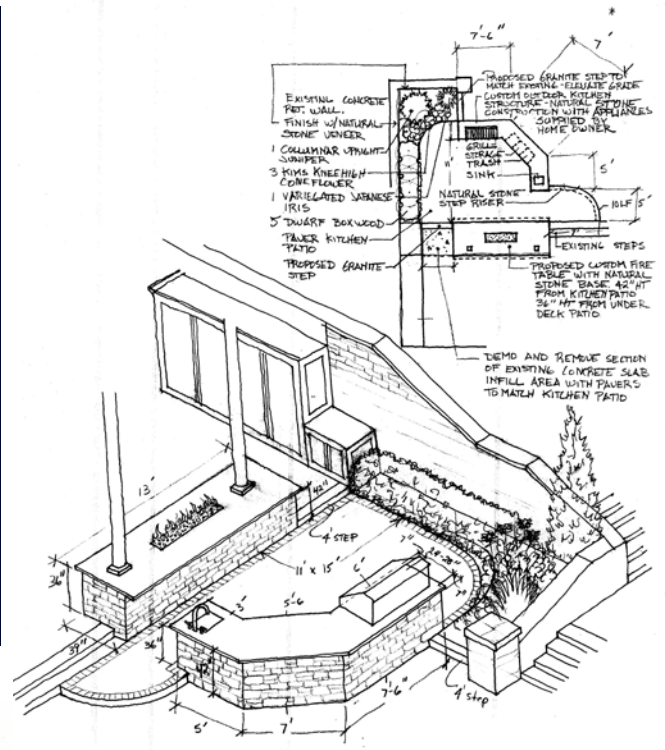

# DESIGN SERVICES \*
